

CHLNet/LEADS Collaborative Webinar

LEADS Impact: CADTH's Case Study
Monday, June 26, 2017, 12pm-1pm EDT

Register yourself and your colleagues for our webinar on leadership development in Canada. Health system improvement and innovation requires new leadership skills. To develop our leaders for the future, a multipronged approach to leadership development must be used but how do we know what these impacts are. This free, interactive session is available to CHLNet Network Partners and LEADS Canada clients. **To register for the webinar, [click here](#).**

The LEADS in a Caring Environment Capabilities Framework can be a powerful tool to help health care organizations in Canada improve their performance and increase their impact. During this webinar, you'll get an overview of the findings from a two-year Mitacs research project on the benefits, opportunities and lessons learned by early adopters of LEADS in Canada. You'll also hear from CADTH, one of the early adopter organizations, about how LEADS has provided the common language and shared experiences to support leadership development throughout the organization and how LEADS has become a touchstone for corporate culture transformation. You'll learn about CADTH's unique approach to implementing LEADS in a medium-sized organization and the tangible benefits they have achieved as a result.

Guest Speakers

Brenda Lammi is the Director of LEADS Canada. She has worked as an occupational therapist in an acute care regional hospital and in community care. She held the position of Director of Policy and Standards for the Canadian Association of Occupational Therapists and concurrently held a faculty appointment at McMaster University in their Masters of Health Management program. At LEADS Canada, Brenda develops partnerships to exceed expectations and ensure the delivery of best practice leadership development and integration services. Brenda is inspired daily by the passion of those working in health care to maximize their abilities, adapt their environment and consistently evolve and improve the health system to enable the best possible services for patients and their families.

Dr. Brian O'Rourke is the President and Chief Executive Officer of CADTH. He joined CADTH in January of 2009 following a distinguished career as a Pharmacist and Health Service Executive with the Canadian military. With over 30 years of experience in health care, Brian actively positions CADTH as the leading source of health technology information in Canada. He has a Bachelor of Science in Pharmacy from Dalhousie University and a Doctor of Pharmacy from the University of Toronto. Brian also serves as the Board Chair for the International Network of Agencies for Health Technology Assessment and served as Co-Chair of CHLNet from 2011 to 2015.

Catherine Dussault, BA, CHRL is the Director, Human Resources at CADTH. Catherine is a proponent of leadership development and inclusive practices to facilitate the achievement of more than would otherwise be possible. Catherine's conviction about the value of leadership development, and the LEADS framework in particular, comes from extensive Human Resources experience, having worked in leadership roles in public, private and not-for-profit sectors.
